Kanghongjin Electronics Co., Ltd.

CUSTOM SPLICE TAPE

DESCRIPTION

M11 Series SMT Cover Tape Extenders are designed to extend cover tape when little or no leader is available. This avoids wasted components and reduces the feeder load time. Quickly adhere the pre-cut strips and elongate reels of all sizes. Ideal for partially cut reels.

Part (reel)	Dimensions (pc)	Package
M1108 (8mm)	40mm x 4.8mm	500pcs/box
M1112 (12mm)	40mm x 6mm	500pcs/box
M1116 (16mm)	40mm x 9.5mm	500pcs/box
M1124 (24mm)	40mm x 16mm	250pcs/box

APPLICATION

1. Strips of PET tape used as a leader to avoid wasted components
2. Perfect for use on partially cut reels
3. 32mm-88mm available upon request
4. All sizes available in 396/508mm length

ADVANTAGES

1. Non-skid leader tape material
2. Strong adhesive bond
3. Reduce lost components
4. Reduce feeder load time

KANGHONGJIN

INSTRUCTIONS

1. Use the splice cutting tool to accurately cut the carrier tapes.
2. Remove the split liner of the splice tape to receive the adhesive side.
3. Align the cut carrier tapes (cover tape down) with the guide alignment.
4. Place both joining carrier tapes onto the strip of the splice tape.
5. Press the tape and discard the clear plastic cover to complete the splice.
