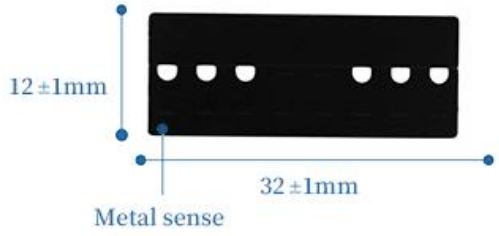
Kanghongjin Electronics Co., Ltd.

AUTOMATIC SPLICE TAPE



DESCRIPTION

M3308B Reel Type splice tape is used for jointing carrier tapes in the SMT process, It is made of tapes, transparent release film and removable PET, and the tape is made by our produced patent material with superior adhesion

Part (reel)	Dimensions (pc)	Material	Package
M3308 (8mm)	12.5mm x 32mm	PET	500pcs/box

KANGHONGJIN

APPLICATION

1. Ideal for automatic splicing machine, high jointing efficiency.
2. Especially used for automatic splicing machines
3. Available for 4mm carrier tapes only.
4. Accept customization

ADVANTAGES

1. Increase Pick and Place machine output by 5% - 30%
2. Reduce reel change downtime
3. Decrease machine abrasion by reducing the need to reload the feeder

INSTRUCTIONS

1. Use the cutting tool to accurately cut the carrier tapes.
2. Remove the release liner of the splice tape to reveal the adhesive side.
3. Place both joining carrier tapes onto the first strip of the splice tape.
4. After sticking it onto carrier tapes, press it tightly at different locations on carrier tapes.
